For **Claim 7**, Isokawa in view of Nakai et al. However, the closest prior art does not teach or fairly suggest wherein the difference between the height of the surface of said transparent layer in the ditch in the diagonal direction of said lens array and the height of the tops of micro lenses each consisting of said resin lens and said transparent resin layer covering the surface of said resin lens is larger than the difference between the height of the surface of said transparent layer in the ditch in an arranging direction of said lens array and the height of the top of the micro lens.
